Re: Energy East Pipeline

To whom it may concern:

Please be advised that as per motion number 110/15 the Council for the Rural Municipality of Saskatchewan Landing No. 167 (RM) supports the TransCanada Energy East Pipeline. Their support is based on First-hand experience of the benefits resulting from existing TransCanada operations.

The Energy East pipeline will reduce the amount of truck traffic on our roads and highways. This reduction in traffic will reduce the costs associated with road repair and maintenance, which is constantly increasing. Furthermore, reduced truck traffic has an environmental benefit as it will reduce air pollutants.

The Energy East pipeline will also prove economic benefit to all levels of government. But RM taxpayers will directly benefit by reduced taxes, job creation and increased local business.

TransCanada has proven to be safe, transparent, informative, environmentally sound, and community minded in the past and Council is confident that these practices will continue with the Energy East pipeline project.

On Behalf of Council,

Corie Lanceleve,
R.M. Administrator
