To Whom It May Concern:

RE: Energy East Pipeline Project

At the regular meeting of the Village of Czar council on August 13, 2015, it was resolved that the Village of Czar send a letter in support of the TransCanada Pipeline Energy East Project.

The Village of Czar is no stranger to pipelines in our area and have been in favor of every one. The environmental impact is minimal when oil is running through a pipeline versus being transported down the road via truck or on the railway via train. As a Village, Czar has a CP Rail track that runs through the center of town, which has greatly increased the number of cars and trips through out town, due to the increased transportation of oil. The danger of having something happen with a train derailment is far greater than having an issue with oil being transported safely through the ground.

As a community, we are very tied to the oil as far as job creation and economic development in our area. With the development of the TransCanada Pipeline Energy East Project, the community and surrounding area would benefit exponentially. With the increased flow of oil down a pipeline, this will bring increased job creation, increased infrastructure, as well as increased business investment in our areas. As any community, we welcome all of these as progressive and positive.

The TransCanada Pipeline Energy East Project can provide a positive impact at every level, from safe distribution, to increased investment in many area, and will be a huge benefit not only to Eastern Alberta but all of Canada, by providing a safe and plausible delivery of CANADIAN oil to CANADIAN provinces. We can only see benefits in Canada utilizing Canadian made products. We are excited for the endless possibilities as this project continues forward and progresses toward completion.

Sincerely
The Village of Czar
