Re: Letter of Support for Energy East Pipeline Project

Cypress County Council is pleased to offer its support for the TransCanada Energy East Pipeline project.

This 4,600 km pipeline is very important to the economy of Alberta. It will provide thousands of jobs and there will be economic opportunities all along the pipeline. Many industries and businesses in our area may benefit, keeping the economy of southeastern Alberta vibrant. By transporting crude oil from Alberta to the east coast, Canada will reduce its dependence on imported oil. Cypress County will benefit directly by increased tax revenue from the pipeline. A pipeline is viewed as a safer and more efficient method of moving oil than on the railway.

County Council is looking forward to the completion of this cross-Canada pipeline and the overall benefits that society will receive.

Yours truly,

Richard Oster
