Energy East Project
Trans Canada

11 March 2016

Re: Energy East Pipeline

This letter confirms the Municipal District of Acadia's support for Trans Canada's Energy East Project. Although this pipeline does not enter the boundaries of our municipality, we are confident that its construction and commission will be invaluable to the energy security of Alberta, Canada and the rest of the world. Energy East represents a rare opportunity for a single project to have long-term and lasting benefits to an entire country simultaneously. As such, the council of the Municipal District of Acadia passed the following motion at the regular council meeting of 8 March 2016:

Motion 029\2016:

Moved by Councillor Grudecki that the Municipal District of Acadia, in recognizing an issue of national significance, fully support Trans Canada in their effort to gain approval to construct the Energy East Pipeline Project.

CARRIED

Regards,

Brent Williams (on behalf of council)
Chief Administrative Officer
