July 12, 2016

To Whom It May Concern,

For over 60 years, TransCanada Pipelines has been supplying oil to Canadians from Alberta to Quebec. With the proposed Energy East project, TransCanada Pipelines will continue in their traditions of serving Canadians by extending their service all the way to the East Coast.

The building of the Energy East project will create a huge economic boom not only to the construction industry itself, but to the retail and service industries in many communities, both rural and urban across our country.

The completed pipeline will provide an environment safe system of transporting oil across the nation and will benefit all provinces it travels through in millions of dollars in tax revenues.

It is for these reasons the Council of the Municipality of Glenboro South Cypress supports the TransCanada and its Energy East Pipeline Project.

Sincerely,

A handwritten signature in blue ink, appearing to read "Earl Malyon".

Earl Malyon, Mayor
Municipality of Glenboro South Cypress
