To Whom It May Concern:

**RE: TRANS CANADA ENERGY EAST PIPELINE PROJECT**

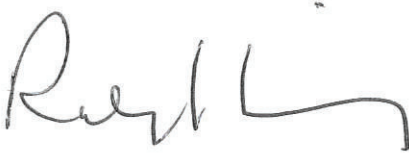

The Council of the Rural Municipality of Morris fully supports the initiative of the Trans Canada to pursue the development of the Energy East Pipeline Project.

The municipality recognizes the minimal environmental risks and safety aspects of the pipeline as compared to rail or highway transportation of the product.

We also recognize the economic benefits to the urban and rural centres that are in close proximity to the project.

We believe that the benefits far outweigh any concerns that may arise and trust that the Project will be permitted to proceed.

Sincerely,

Ralph Groening  
Reeve  
Rural Municipality of Morris
